WASTE BIN FOR INSIDE

SENSOR BIN

Description:

Hygienic way with Sensor Waste Bin: allows you to dispose of more waste while keeping space cleaner and neat looking. The sensor cover reacts to movement and opens automatically - without contact!

The extra-large waste bin made of stainless steel combines high comfort with a luxurious look. The classically simple design makes an eye-catching in your kitchen or office. The stainless steel material is durable and insensitive to scratches and dirt. So your bin still looks great even after prolonged use. With modern sensor technology: The stable waste bin has a control panel, which allows you to open and close the lid automatically by pressing a button. You can also simply switch off the sensor technology and open the lid manually.

Application:

Indoor areas

Ideal for:

Clinics, offices, kitchens and other sanitary facilities

INFO STAND CLASSIC WITH HINGED FRAME

Description:

The information DIN A4 stand is available in two models (miter corners and round corners) with a basic folding technique for quick motive change. 0.7 mm thick protective cover protects against pollution and other liquids. It is used for information display e.g. for your entrance, public institutions and sales area. The stand is very stable and the rounded corners reduce the risk of injury.

Application:

Indoor areas

Ideal for:

Offices, museums, showroom, trade fairs, schools, shopping centers and public institutions
